

Why see a dentist by age one?

Fast Facts from Southern Minnesota Initiative Foundation's Early Childhood Dental Network

PREVENT PROBLEMS

The dentist can check your child's mouth for any problems. The dentist can also give you ideas on brushing, food choices and fluoride use.

FIND THE RIGHT DENTIST FOR YOUR FAMILY

The dentist and dental staff should be friendly to both you and your child. They can answer your questions and help with your dental concerns.

BABY TEETH ARE IMPORTANT!

Problems with baby teeth can change how your baby acts, eats and sleeps. A healthy mouth is a happy mouth (and a happy baby)!
